

More relaxing bath time for people all around the world. Noritz is constantly innovating our production technology to realize higher quality, transmitting cutting edge technology to the world.

NAM Area (Noritz Akashi Messe, Japan)

Production System

At Noritz's production sites, approximately 18,000 models are being produced in mixed model production. This system enables high production efficiency and product quality, strictly meeting delivery times. This is attracting great attention from the world.

Production Engineering Development Center

NRPS (Just-in-time System Production Line)

Noritz Akashi Main Factory (Quality Inspection)

Noritz (Shanghai) Home Appliance (Quality Inspection)

Quality Policy

To satisfy customers' higher expectations, our production control approach takes into account originality, patent strategy and risk management as well as quality, cost and delivery considerations.
